

Tim Crighton

High Performance Motorsport Coaching & Consultancy; specialising in historic racing.

Based in the South West of the UK

20+ years race experience including manufacturer academy drives, British GT, British Endurance Championship, Goodwood Revival & Members Meeting (Podium Finisher) in a range of cars from Pre War Grand Prix cars to contemporary GT3. A multiple race winner, pole qualifier and lap record holder across a range of formulae.

Highly experienced in communicating the nuances required to tailor driver technique to a specific car; something particularly applicable to historic racing where you are often running cross ply tyres, limited to no aero and far more basic suspension technology, requiring us to think differently about the car underneath us as a driver.

In addition to driver coaching on circuit, I work with a number of drivers and owners to assemble and manage their car collections for historic and modern historic racing.

I believe that every driver has unique needs and needs to be coached in a different way to achieve their maximum potential; and to enjoy racing safely and competitively.
